AMUSEMENT LOGIC, PUTS INTO PLAY A MULTIDISCIPLINARY TEAM, PASSIONALLY CREATIVE, WITH A FIRM AND STRONG VOCATION OF SERVICE TO THE HOSPITALITY SECTOR.

During its more than **20 years of work**, Amusement Logic has earned a place as an **international benchmark** in the **hotel industry**. There are many projects in which it has given its body and soul, in the **five continents**, in collaboration with the **main operators of the sector**.

Like our clients, we are seduced by **innovative and unique concepts**, to which we always add good taste, elegance, proportion, without losing sight of the **practical aspect**, and never forgetting that to thoroughly achieve it we must aspire to the **highest quality**.

From our headquarters in Valencia, Spain, **Amusement Logic opens up to the world** to provide **cutting-edge services** in two aspects:

- Construction: design, planning, development, manufacturing and construction services of the hotel facility.
- Remodeling: renovation services of façades, interior design, dry leisure areas, water leisure areas, swimming pools, landscaping and outdoor furniture.

For Amusement Logic **there are no borders** or languages. Amusement Logic only speaks one language, and it is the international language of **quality and rigor** at work. Spain, France, China, Russia, the Middle East, the United States ... Our **international presence** is an essential asset, inspires in us a **constant desire for improvement**.

THESE ARE SOME OF THE HOTEL GROUPS THAT ALREADY TRUST US:

And many more....

ARCHITECTURE

We like architecture. We are [capable of everything for architecture](#). We are capable of collaborating with external architects or work with our own architects. Whether [partial or complete projects](#). We have collaborated with large international architecture studios as well as with professional freelancers. We get along with everyone. And we do not have fear challenges. In fact, we have successfully achieved many.

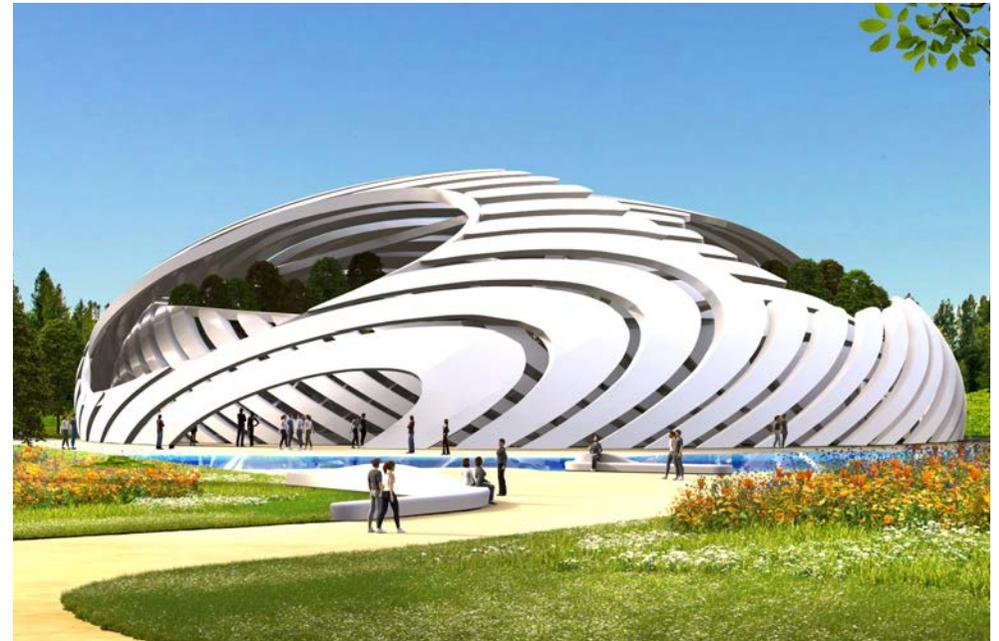

Our [3D TECH technology](#), with almost unlimited versatility, allows us to offer a [fast and economic solution](#) for the renovation of the existing façades, or the execution of spectacular designs.

IMPRESSIVE FAÇADES

SPECTACULAR INTERIORS

ALL-INCLUSIVE RESORTS

Amusement Logic always accompanies those operators that do not conform to the state of things, that go beyond in their [desire to go further](#), in their desire for transformation, for constant improvement, for [evolution](#). All-inclusive resorts have been like that for years, have been renewing for a long time, [adapting to the new times](#). It is a road that has no end, and that's why we like it. Because we are [avant-garde](#), because we look to the future without forgetting the past, because our experience allows us to occupy that place.

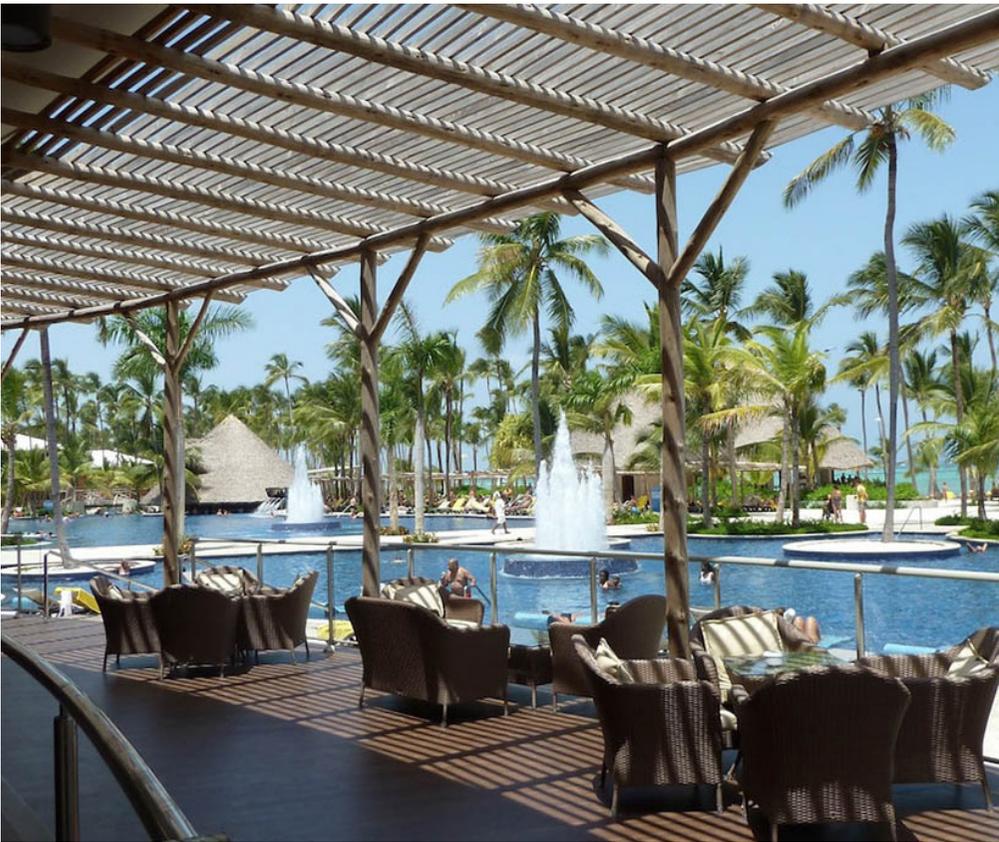

THE SWIMMING POOL, KEY FACTOR IN THE POSITIONING OF THE HOTEL

The swimming pool ceased to be a complement to become the **success engine of the hotel**. Modern hotels **compete amongst each other** with water parks, health clubs, or even natural beaches. They offer their guests all the **aquatic leisure options**: large surfaces of crystalline waters and variable depths, games for children, for adults, relaxation areas, spas and hydrotherapy, recreated landscapes and much more. It is something that is **no secret to us**.

TREND INVENTORS

We are *restless*. We can not stop. Ideas buzz in our heads. This ability allows us to *create trends*, think about new products that work, *execute any innovative project* from start to finish, from the idea to the construction. Don't worry, let us develop your expectations. When we finish *all you need to do is "turn the key"*.

We also have a wide *catalog of innovative products*, specifically designed to *transform existing pools* with a minimum investment. Update or be outdated, that is the question.

CHILDREN'S POOL

GETTING WET WITHOUT A POOL - THE SPLASH PADS

DRY LEISURE AREAS
