WHITE CORAL F&B

Cloudland playground 4-8 years old

We're proposing the first installation of our new "Hexagon" collection, with the aim of creating modern and innovative games areas. Based on a domed, modular and polyhedral structure, it offers the opportunity of hanging different interactive elements. By exploring its possibilities, children can create their own games.

The Cloudland model consists of a fun and random cloud of spheres, that are threaded at different heights on a matrix of tensed ropes, so that children can enjoy inventing a multitude of routes in a three-dimensional and multicolour space.

Designed to enhance balance and psychomotor skills, it allows the creation of different paths through colour-coding that indicates the levels of difficulty.

Funny Path, play area 2-4 years old

We're proposing a new concept of interaction and entertainment for kids and teens, based on balance and ability: Funny Paths. A circuit for motor skills in which the actions of jumping, climbing, descending and keeping one's balance, even with one foot on a sphere, take on a new meaning through winding courses of interwined multi-height pedestals. Each height implies a level of greater difficulty.

Constructed in 3D-Tech, ideal for this type of applications due to its impact-absorption capacity, it also allows for rapid indoor and outdoor installation.

As a result of the intersections of the different routes, there are closed areas where ball-pools can be included, increasing as such the leisure possibilities of an indoor facility.
